

## Remote Sensing Applications in Natural Resources Using ArcGIS

**NRM641 CRN 35760**

<https://elearning.uaf.edu/courses-code-keep/course-details-17-18/?crn=35760>

CREDITS: 3

PREREQUISITES: Basic ArcMap experience

LOCATION: Distance Delivery from Fairbanks campus

MEETING TIME: Spring Semester 2018 Jan. 16 May 1

INSTRUCTOR: Dr. David Verbyla (email: [dlverbyla@alaska.edu](mailto:dlverbyla@alaska.edu))

OFFICE LOCATION: ONEILL 368

OFFICE HOURS: Tues/Weds 1-2pm face to face, google hangout, or phone/email or email any time (I try to return emails within 24 hours of receiving them)

TELEPHONE: 907-474-5553

EMAIL ADDRESS: [dlverbyla@alaska.edu](mailto:dlverbyla@alaska.edu)

### **COURSE DESCRIPTION**

---

This course is primarily for graduate students and GIS professionals who want to learn remote sensing applications in natural resource management using a variety of remotely sensed Alaska data ranging from high resolution LIDAR to statewide AVHRR data. The class will be taught using a sequence of weekly video sessions and weekly hands-on ArcGIS problems.

### **COURSE GOALS**

---

- 1) To learn basic image processing methods using ArcMap including panchromatic pseudocolor, and color image display, image georeferencing, change detection methods, supervised and unsupervised classification, and accuracy assessment methods.
- 2) To learn about sensors especially applicable to vegetation applications in Alaska including hyperspectral data, LIDAR, IFSAR, Landsat, MODIS, and AVHRR sensors and data products.
- 3) To use ArcGIS to explore changes associated with climate warming in Alaska including greening of the arctic, browning of the boreal forest, mapping wildfire severity and hotspots, mapping shrinking lakes and coastal erosion, etc.

---

	<b>Sensor Applications</b>
<b>Feb 26 – Mar 2</b>	<b>AVHRR Sensor Applications:</b> The Advanced Very High Resolution Radiometer Processing GIMMS-NDVI Rasters 20-Year Change in Peak Summer NDVI By Ecoregion Working with 1-KM AVHRR Alaska Products
<b>Mar 5 - 8</b>	<b>MODIS Sensor Applications</b> MODIS Land Products Assessing MODIS NDVI Reliability Assessing eMODIS NDVI Reliability Working With 250-m NDVI Tiles in Alaska 500-m Snow Product in Alaska
<b>Mar 12 -16</b>	<b>Spring Break (no classes)</b>
<b>Mar 19 - 22</b>	<b>Landsat Sensor Applications:</b> Landsat Sensors Mapping Burned Areas Mapping Arctic Greening Mapping Aspen Defoliation Mapping Radiant Temperature
<b>Mar 26 – Mar 30</b>	<b>IFSAR and LIDAR Applications:</b> Working With IFSAR Data Assessing LIDAR Precision and Accuracy Using LIDAR to Locate Tall Trees Using LIDAR to Map Percent Forest Canopy Closure
<b>April 2 -5</b>	<b>Point Sensor Applications:</b> Creating Density Maps From Point Locations Mapping Hotspot Polygons Interpolating Depth Points Lightning Detections and Weather Station Data
<b>April 9 – May 1</b>	<b>Student Climate Warming Mini-Projects (4 of 8)</b> Mapping Lake Area Change in a Warming Boreal Climate 25-Year Trend in Annual Maximum NDVI 35-Years of Declining Sea Ice Extent Mapping Glacier Recession in the Alaska Range Mapping Coastal Erosion in a Warming Arctic Decadal Arctic NDVI and Summer Warmth Index Winter Warming, Canopy Icing, and White Spruce Mortality Declining Sea Ice Concentration and Autumn Warming at Barrow

## **STUDENT LEARNING OUTCOMES**

---

*After successfully completing this course you will:*

Understand what spectral bands are most appropriate for a variety of remote sensing applications

Understand how to effectively display panchromatic, color, color infrared and false color imagery.

Understand how to merge panchromatic and multispectral bands and how to create fly in and fly-by animations.

Use unsupervised classification and supervised classification methods to create land cover maps.

As described by UAF, scholastic dishonesty constitutes a violation of the university rules and regulations and is punishable according to the procedures outlined by UAF. Scholastic dishonesty includes, but is not limited to, cheating on an exam, plagiarism, and collusion. Cheating includes providing answers to or taking answers from another student. Plagiarism includes use of attribution. Collusion includes unauthorized collaboration with another person in preparing written work for fulfillment of any course requirement. Scholastic dishonesty is punishable by removal from the course Student Code of Conduct. (<http://uaf.edu/usa/student-resources/conduct>)

**UAF eLearning Student Services** helps students with registration and course schedules, provides information about lessons and student records, assists with the examination process, and answers general questions. Our Academic Advisor can help students communicate with instructors, locate helpful resources, and maximize their distance learning experience. Contact the UAF eLearning Student Services staff at 907.455.2060 or toll free 1.800.277.8060 or contact staff directly for directory listing see: <http://elearning.uaf.edu/contact>

#### **UAF Help Desk**

Go to <http://www.alaska.edu/oit/> to see about current network outages and news.

Reach the Help Desk at:

e-mail at [helpdesk@alaska.edu](mailto:helpdesk@alaska.edu)

fax: 907.450.8312

phone: 450.8300 (in the Fairbanks area) or 1.800.478.8226 (outside of Fairbanks)

The **UAF Office of Disability Services** operates in conjunction with UAF eLearning. Disability Services, a part of UAF's Center for Health and Counseling, provides academic accommodations to enrolled students who are identified as being eligible for these services. If you believe you are eligible, please visit their web site (<http://www.uaf.edu/disability/>) or contact a student affairs staff person at your local campus. You can also contact Disability Services on the Fairbanks campus by phone, 907.474.5655, or by e-mail ([uaf-disabilityservices@alaska.edu](mailto:uaf-disabilityservices@alaska.edu)).

University of Alaska Board of Regents have clearly stated in BOR Policy that discrimination, harassment and violence will not be tolerated on any campus of the University of Alaska. If you believe you are experiencing discrimination or any form of harassment including sexual harassment/misconduct/assault, you are encouraged to report that behavior. If you report to a faculty member or any university employee, they must notify the UAF Title IX Coordinator about the basic facts of the incident.
