

Enrollment in all degree levels has increased significantly each year since the implementation of the special league, regardless of discipline.

Make the Office of Undergraduate Research and Scholarship a priority in the budget for discipline and interdisciplinary special league enrollment and career.

Add discipline-specific disciplines to undergraduate and graduate enrollment in the college and the Biological League of Science, Technology, and the Alaska IDEA Network of Biological Research Excellence, the Alaska Established Program of Clinical Research, and the Alaska League of Science and Technology. Provide a database for special league enrollment by discipline.
